

### Progress on gender equality in Spain since 2010

With 72.0 out of 100 points, Spain ranks 8th in the EU on the Gender Equality Index. Spain's score is 4.1 points above the EU's score.

Since 2010, its score has increased by 5.6 points. A slight increase (1.9 points) has been achieved since 2017. Spain's ranking has remained the same since 2010.

#### Best performance

Spain's scores are highest in the domains of health (90.1 points) and money (77.8 points). It has one of the highest scores among all countries in the domain of health (ranking 7th).

#### Most room for improvement

Gender inequalities are most pronounced in the domains of time (64.0 points) and knowledge (67.6 points), although the latter is one of the highest scores among all countries (ranking 6th).

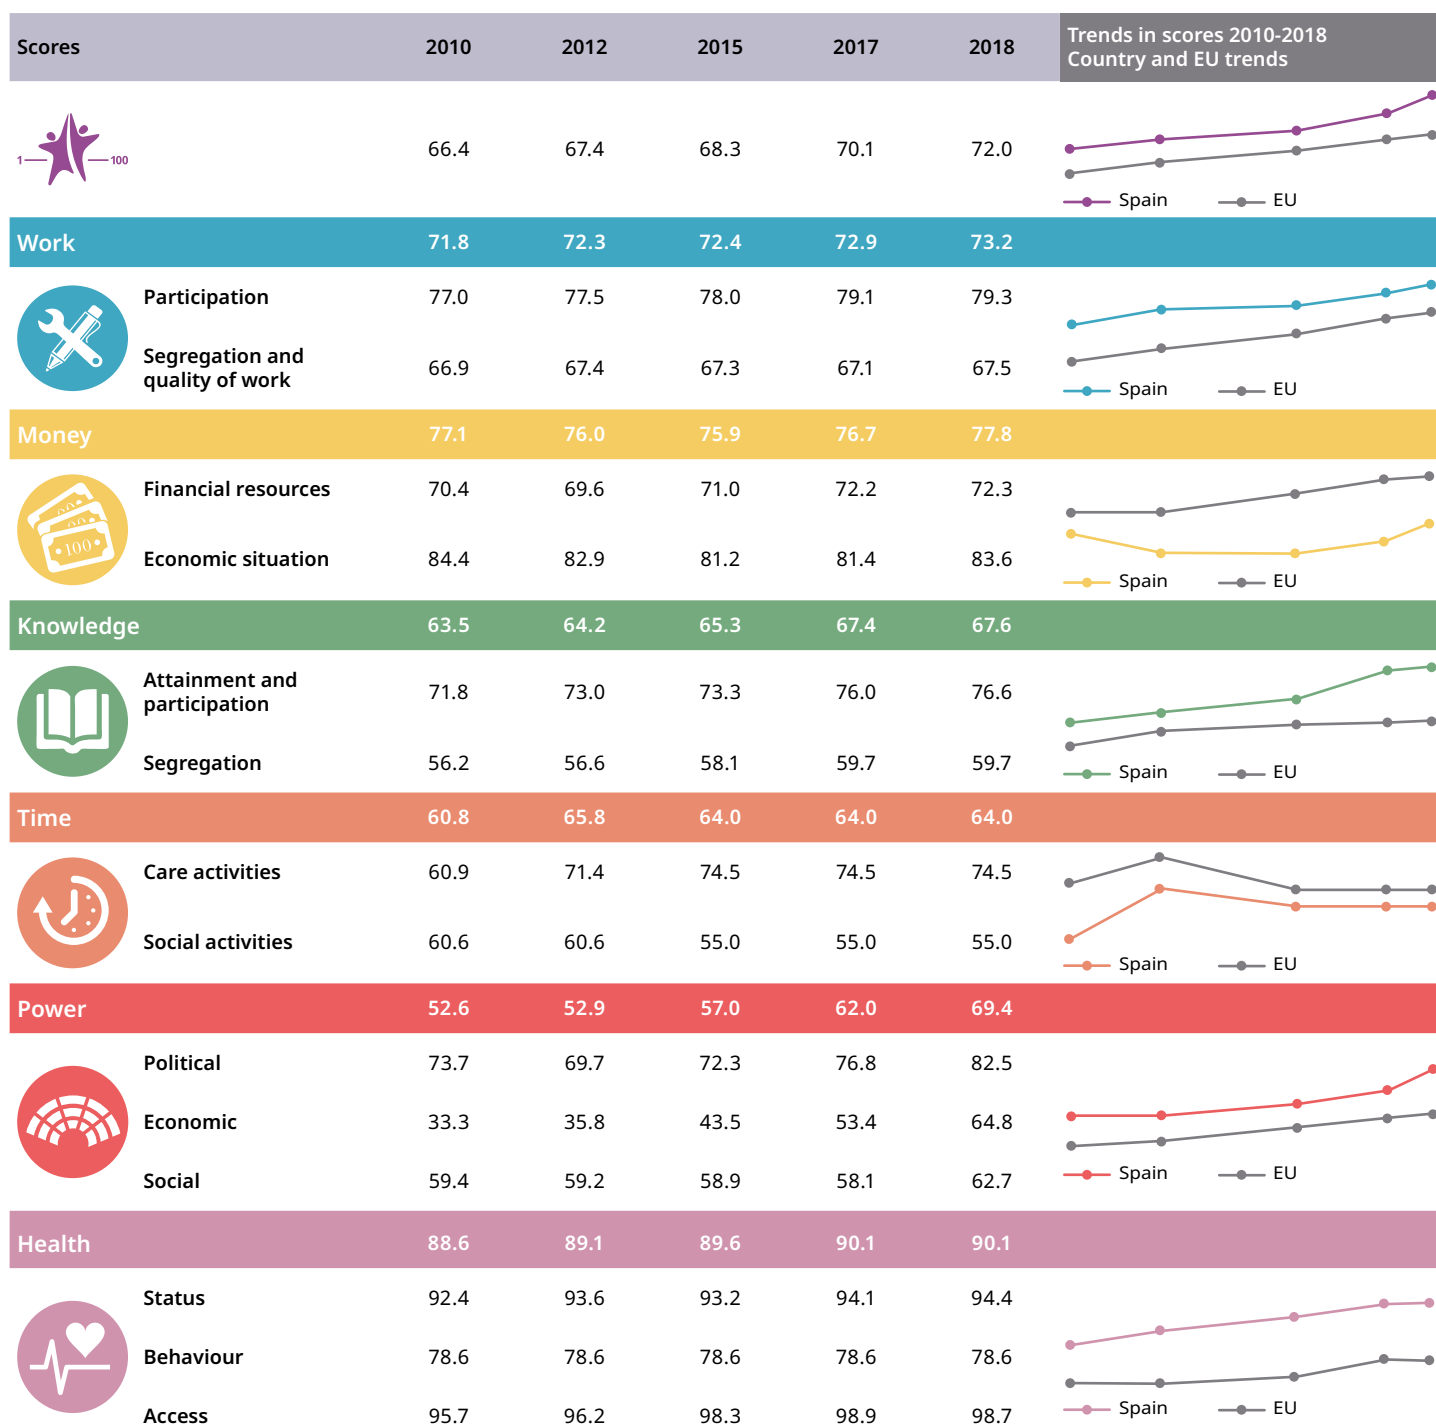

#### Biggest improvement

Spain's score has improved the most in the domain of power, by 16.8 points from 2010 and 7.4 points from 2017. Its ranking increased by one place in this domain between 2010 and 2018 (ranking 4th).

#### Least progress

Since 2010, Spain's scores have increased only slightly in the domains of money (+ 0.7 points) and health (+ 1.5 points), although in the domain of health it improved its ranking by four places.

# Explore Spain's Index results

## About the Index

Each year, we score the EU Member States and the EU as a whole to see how far they are from reaching gender equality. The Index uses **a scale of 1 to 100, where 1 is for total inequality and 100 is for total equality.**

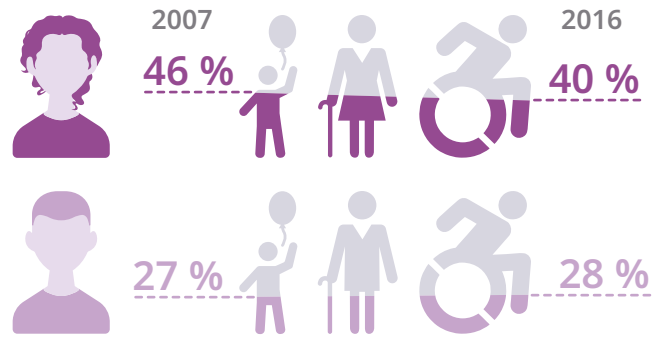

The scores are based on the gaps between women and men and levels of achievement in six core domains – work, money, knowledge, time, power and health – and **their subdomains. Two additional domains** are included in the Index but do not have an impact on the final score. The domain of intersecting inequalities highlights how gender inequalities manifest in combination with age, (dis)ability, country of birth, education and family type. The domain of violence against women measures and analyses women's experiences of violence. The Index is composed of **31 indicators.** The Gender Equality Index 2020 also includes **a thematic focus on digitalisation and the future of work.**

# Key highlights

## Narrower gender gap in time spent on unpaid care work

The gender gap in care activities has decreased, as the percentage of women with daily caring responsibilities has decreased, while the percentage of men has slightly increased.

## Improvements in economic decision-making

The shares of women on the board of the central bank and on the boards of the largest publicly listed companies have increased.

## Gender balance in parliament reached

Spain introduced a legislative candidate quota of 40 % in 2007. The share of women members of parliament has since increased.

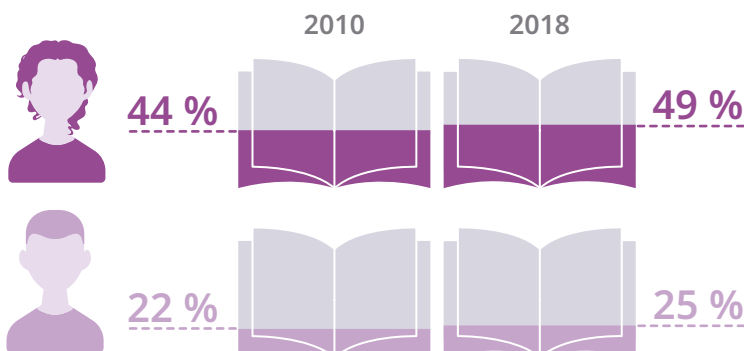

## Gender inequalities in financial situation persist

Women continue to earn less than men, despite overall earnings rising for both women and men.

## Risk of poverty has gone up

The risk of poverty has slightly increased for both women and men.

## Uneven concentration of women and men in education is becoming more pronounced

More women than men study education, health and welfare, or humanities and the arts, and the gap is growing.

## Violence

### Why is there no score for the violence domain?

There is no new data to update the score for violence, which is why no figure is given. Eurostat is currently coordinating an EU-wide survey on gender-based violence, with results expected in 2023. EIGE will launch a second round of administrative data collection on intimate partner violence, rape and femicide in 2022. Both data sources will be used to update the domain of violence in the Gender Equality Index 2024.

Unlike the other domains of the Index, the domain of violence does not measure differences between women's and men's situations; rather, it examines women's experiences of violence (prevalence, severity and disclosure). The overall objective is not to reduce the gaps in violence between women and men, but to eradicate violence completely.

**Data gaps mask the true scale of violence.**

**The EU needs comprehensive, up-to-date and comparable data to develop effective policies that combat violence against women.**

### Violence at a glance

**Femicide**

**17 women killed by a family member  
47 women killed by their partner**

Source: Eurostat

**Female Genital Mutilation (FGM)**

**No data available**

**Cyberviolence**

**0.4 % of women experienced  
online harassment**

Source: Eurofound, European Quality of Life Survey

During the COVID-19 lockdowns, women in violent relationships were stuck at home and exposed to their abuser for long periods of time, putting them at greater risk of domestic violence. Even without a pandemic, women face the greatest danger from people they know.

### Istanbul Convention: state of play

The Istanbul Convention is the most comprehensive international human rights treaty on violence against women and domestic violence. Spain signed the Istanbul Convention in May 2011 and ratified it in April 2014. The treaty entered into force in August 2014.

## Thematic focus on digitalisation and the future of work

The Gender Equality Index 2020 focuses on digitalisation and the future of work. The thematic focus looks at three areas:

- use and development of digital skills and technologies;
- digital transformation of the world of work (segregation, working conditions, work-life balance);
- broader consequences of digitalisation for human rights, violence against women, and caring activities.

## Above basic problem-solving skills in the 55-74 age group

### ICT graduates

### Part-time in ICT

| Main indicators   | Spain  |        | EU     |        |
|---|--------|--------|--------|--------|
|   | Women  | Men    | Women  | Men    |
| <b>Digital skills</b>   |        |        |        |        |
| Internet daily users (16-74, %, 2019)   | 78     | 77     | 78     | 80     |
| Above basic digital skills (16-74, %, 2019)   | 35     | 37     | 31     | 36     |
| <i>Information skills</i>   | 74     | 73     | 71     | 71     |
| <i>Communications skills</i>  | 67     | 66     | 67     | 66     |
| <i>Problem-solving skills</i>   | 58     | 61     | 56     | 63     |
| <i>Software skills</i>  | 42     | 45     | 39     | 44     |
| Training to improve digital skills (16-74, %, 2018)   | 20     | 23     | 18     | 22     |
| <b>Segregation in education and labour market</b>   |        |        |        |        |
| ICT graduates (% , 2018)  | 12     | 88     | 20     | 80     |
| ICT specialists (15 +, %, 2019)   | 17 (s) | 83 (s) | 18 (s) | 82 (s) |
| Scientists and engineers in high-technology sectors (25-64, %, 2019)                                | 28     | 72     | 20     | 80     |
| <b>Working in ICT</b>   |        |        |        |        |
| ICT at work and activities performed (16-74, %, 2018)   |        |        |        |        |
| <i>Used computer, laptop, smartphone, etc.</i>  | 31     | 35     | 37     | 42     |
| <i>Used other computerised equipment</i>  | 6      | 11     | 8      | 13     |
| <i>Exchanged emails</i>   | 26     | 29     | 32     | 36     |
| <i>Created or edited electronic documents</i>   | 20     | 22     | 24     | 28     |
| <i>Used social media</i>  | 10     | 11     | 9      | 11     |
| <i>Used applications to receive tasks or instructions</i>   | 13     | 15     | 10     | 14     |
| <i>Used occupation-specific software</i>  | 18     | 21     | 19     | 24     |
| <i>Developed or maintained IT systems or software</i>   | 3      | 6      | 3      | 7      |
| Part-time in ICT (20-64, %, 2018)   | 13     | 3      | 17     | 5      |
| Working time arrangements among ICT specialists (20-64, %, 2015, national-level data not available) |        |        |        |        |
| Gender pay gap in ICT (% , 2014)  |        | 6      |        | 11     |

In the EU, 21 % of women and 22 % of men entirely determined their working hours themselves, compared with 13 % of women and 18 % of men in other occupations

Source: Eurostat (education statistics, digital economy and society statistics, European Union Labour Force Survey, Structure of Earnings Survey), Eurofound (European Working Conditions Survey)  
s: Eurostat estimate  
Some areas of concern (e.g. platform work and artificial intelligence) are not covered by the indicators owing to a lack of EU-wide comparable data.
